Message from the Guest Editors

Dear Colleagues,

Recent developments in ground-based sensors have advanced 3D measurements, low-cost permanent systems and community-based monitoring of forests. There still is an urgent need to better understand the options and limitations of remote and close-range sensing techniques in the field of degradation and forest change. We invite scientists working on remote sensing technologies, close-range sensing and field data to contribute to this Special Issue. Topics of interest include (a) novel remote sensing applications that can advance the needs on forest resource information and REDD+ MRV; (b) case studies of applying remote sensing data for REDD+ MRV; (c) timeseries algorithms and methodologies for forest resource assessment at the different spatial scales; (d) novel close-range sensing applications that can support sustainable forestry and REDD+ MRV.

Special Issue

Editors-in-Chief

Prof. Dr. Cate Macinnis-Ng
Department of Biological Sciences, Faculty of Science, University of Auckland, Private Bag 92019, Auckland 1142, New Zealand

Prof. Dr. Giacomo Alessandro Gerosa
Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.
Journal Rank: JCR - Q1 (*Forestry*) / CiteScore - Q1 (*Forestry*)
