Deadline for manuscript  
submissions:

**closed (30 November 2019)**

### Message from the Guest Editors

Forest landscapes can be viewed as mosaics of woodlands and other land cover habitats, either natural or semi-natural. Edges between woodlands and other land cover types are often fundamental ecological niches that might be shaped with forestry operations. Management and planning of these landscapes requires one to adopt an all-lands approach, with boundaries at different spatial scales to define management from multiple perspectives and for multiple land cover types. Topical issues in forestry need to acknowledge the mutual ecological and socio-economical relationships between forested and non-forested land cover types. A bifurcated model of management of woodlands as opposed to the management of non-forested habitats might not be the best solution to provide an array of ecosystem services. The spatial and temporal interrelation between forest ecosystems, their management, and the associated ecosystems should be transposed to landscape-scale planning approaches. This should be combined with a landscape-scale governance and regulatory system. We welcome reviews and works on the abovementioned topics, which result from ecological, economical, social, and political investigations.

## Editors-in-Chief

### **Prof. Dr. Cate Macinnis-Ng**

Department of Biological Sciences, Faculty of Science, University of Auckland, Private Bag 92019, Auckland 1142, New Zealand

### **Prof. Dr. Giacomo Alessandro Gerosa**

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

## Message from the Editorial Board

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

**Journal Rank:** JCR - Q1 (*Forestry*) / CiteScore - Q1 (*Forestry*)
