Message from the Guest Editor

Dear Colleagues,

Fertilizer use in eucalypt plantation is now similar to some agricultural production systems. The knowledge base for nutritional diagnosis and the development of fertilizer prescriptions that optimize eucalypt production are questions that drive research. In several cases, it is soil-climate-species management specific. However, much of this research could be used in different areas and countries. This special issue focuses, not only on research results, but also methods for nutritional diagnosis and fertilizer prescriptions for *Eucalyptus* plantation.

Prof. Dr. Reynaldo Campos Santana

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.
Journal Rank: JCR - Q1 (*Forestry*) / CiteScore - Q1 (*Forestry*)
