### Message from the Guest Editors

The cycling of nutrients through the soil–plant community system is a basic reality of all vegetation-based terrestrial ecosystems, and is a necessity for their stable existence. Nevertheless, changing conditions of climate, soil and plant community autoecology enable such cycles to differentiate into a vastly different array of possible ‘solutions’, intended as combinations of processes that allow the persistence of the soil–vegetation system. It is a seductive idea to treat each ‘solution’ as a major ecosystem trait.

In the field of forests, the last few years have seen a large amount of research being published, contributing to the knowledge of nutrient fluxes from different approaches; yet, most publications were actually focused on different subjects. We feel that the time has now come to start a focused debate on forest nutrient cycles, aiming at a systematic approach.

Thus, we propose a Special Issue centering on this theme. In this Special Issue, we will not treat any approach as preferential to any other, and we are encouraging the submission of studies dealing with soil–forest nutrient cycles from different approaches.

## Editors-in-Chief

### **Prof. Dr. Cate Macinnis-Ng**

Department of Biological Sciences, Faculty of Science, University of Auckland, Private Bag 92019, Auckland 1142, New Zealand

### **Prof. Dr. Giacomo Alessandro Gerosa**

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

## Message from the Editorial Board

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

**Journal Rank:** JCR - Q1 (*Forestry*) / CiteScore - Q1 (*Forestry*)
