Linking Forest Productivity and Tree Growth through Remote Sensing and Tree Ring Analyses

Guest Editors:

Dr. Marín Pompa-García

Dendroecology Lab, Forestry Sciences Faculty, Juarez University of the State of Durango, Durango, Mexico

Dr. Jesús Julio Camarero

Pyrenean Institute of Ecology, Spanish National Research Council (CSIC), Zaragoza, Spain

Dr. Peter Z. Fule

School of Forestry, Northern Arizona University, Flagstaff, AZ, USA

Deadline for manuscript submissions:

closed (31 October 2022)

Message from the Guest Editors

Dear Colleagues,

Traditionally, tree ring data are often utilized in the assessment of the forest response to climate at annual to centennial and stand to continent scales. However, these approaches are often local in extent and spatially discontinuous, which makes upscaling to regional and broader levels challenging. Alternatively, remote sensing data allow enhancing spatial evaluations of climate condition-tree growth relationships, from local to global scales. However, there remain many research gaps on how to better link tree ring and remote sensing data, which deserve more attention. Therefore, novel research approaches should aim to fill these existing gaps. This Special Issue titled "Linking Forest Productivity and Tree Growth through Remote Sensing and Tree Ring Analyses" aims to build a stronger consensus of ecological mechanisms encompassed in remote sensing and tree ring proxies of drought or other climate events. Both research and review papers on this topic are welcomed.

Editors-in-Chief

Prof. Dr. Cate Macinnis-Ng

Department of Biological Sciences, Faculty of Science, University of Auckland, Private Bag 92019, Auckland 1142, New Zealand

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
