Deadline for manuscript  
submissions:  
**closed (15 March 2019)**

### Message from the Guest Editor

Dear Colleagues,

Security patterns are widely considered to be a good way to build secure systems, but they are still rarely used in industry. It is not that security patterns are not used, it is just that they should be used more.

Security patterns are starting to be accepted, with some companies producing catalogs in books and in the web. We would like to hear from people using security patterns and find out their experiences with them. Another related question is: Do we have better alternatives?

Prof. Dr. Eduardo B. Fernandez

## Message from the Editor-in-Chief

*Future Internet* is a fast-growing journal devoted to rapid publications of the latest results in the general areas of computer networking/communications and information systems, with a focus on the Internet of Things, big data and augmented intelligence, smart systems (in terms of technologies, architectures, and applications), network virtualization, edge/fog computing, and cybersecurity. Both theoretical and experimental papers are welcome. Every year, *Future Internet* also features Special Issues dedicated to specific topics within the journal's scope.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, Inspec, and other databases.

**Journal Rank:** CiteScore - Q1 (*Computer Networks and Communications*)
