Deadline for manuscript  
submissions:  
**closed (30 September 2021)**

### Message from the Guest Editors

Dear Colleagues,

Galaxies observation has posed many new experimental challenges and produced new theoretical explanations that have not yet been completely confirmed. The search for pertinent consistent theoretical schemes has not yet reached modellization. A consistent theoretical structure able to explain the formation galaxies, their composition, and evolution has not attained a complete formulation.

The structure and evolution of galaxies is strongly determined by the properties of dark matter and the exploration of galaxies can shed light on its physical nature involving methods of cosmoparticle physics of cross-disciplinary study of new physics in proper combination of its physical, astrophysical and cosmological signatures.

The papers of invited authors will be published, free of charge, with full open access after peer review to benefit both authors and readers.

Prof. Orchidea Maria Lecian  
Prof. Alexander Al'bertovic Kirillov

Andalucía (IAA-CSIC), Glorieta de  
la Astronomía S/N, 18008  
Granada, Spain

## Message from the Editorial Board

*Galaxies* provides an advanced forum for studies related to astronomy, astrophysics, and cosmology, including all of their subfields. Different formats, such as specialized research articles, reviews, communications and technical notes are welcomed. Manuscripts containing original and creative research proposals and ideas are especially appreciated.

We encourage scientists to publish their astronomical observations and theoretical results in as much detail as possible. There is no restriction on the paper length and full experimental and methodological details, as applicable, should be provided. All papers will be peer reviewed promptly. On behalf of the distinguished members of the editorial board, I extend my welcome to all researchers working on these subjects to contribute to *Galaxies*.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, ESCI (Web of Science), Astrophysics Data System, INSPIRE, Inspec, and other databases.

**Journal Rank:** CiteScore - Q2 (*Astronomy and Astrophysics*)
