Message from the Guest Editor

Dear Colleagues,

This Special Issue of *Games* is devoted to the analysis of novel models of choice behavior and their implications for group decisions. Submissions are encouraged from all areas of individual and group decision making, including, but not restricted to, axiomatic foundations of choice rules, procedural aspects of individual decision making, (computational) complexity analysis of individual and group decisions, characterizations of collective choice methods. The keywords below are merely indicative.

Prof. Dr. Dinko Dimitrov
