Deadline for manuscript submissions:

closed (31 May 2018)

Message from the Guest Editor

Dear Colleagues,

Tumor cell dormancy remains one of the leading causes of cancer relapse after clinical treatment. Depending on their cellular microenvironment and genetic heterogeneity, disseminated tumor cells may proliferate or become quiescent. The mechanisms that govern tumor cell dormancy are not yet well understood and appear to involve cellular, angiogenic and immunological processes.

The aim of this Special Issue is to provide an updated view of the current status of research on metastasis and cancer dormancy, and their implications for better understanding cancer progression and treatment resistance.

Dr. Roger Gomis

Message from the Editor-in-Chief

Genes are central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fastmoving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised.

Why not consider *Genes* for your next genetics paper?

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank: JCR - Q2 (*Genetics & Heredity*) / CiteScore - Q2 (*Genetics*)
