Head and Neck Genetics—2nd Edition

Guest Editor:

Prof. Dr. Christos Yapijakis

1. University Research Institute of Maternal and Child Health and Precision Medicine, School of Medicine, National Kapodistrian University of Athens, 115 27 Athens, Greece

2. Unit of Orofacial Genetics, 1st Department of Pediatrics, School of Medicine, National Kapodistrian University of Athens, “Aghia Sophia” Children’s Hospital, 115 27 Athens, Greece

Deadline for manuscript submissions:

closed (20 October 2024)

Message from the Guest Editor

The field of head and neck syndromes was de facto initiated approximately half a century ago when Robert J. Gorlin, then professor of oral pathology at the University of Minnesota School of Dentistry (Minneapolis, USA) and Jens J. Pindborg, then professor of oral pathology at the Royal Dental College/University of Copenhagen School of Odontology (Copenhagen, Denmark), published the first Edition of the compendium *Syndromes of the Head and Neck* after researching the literature and summarizing at the time over 100 syndromes, each with an oral or facial component. The decades that passed since have seen the advent of major discoveries, including the full deciphering of the genetic code, recombinant DNA technology, improved molecular analysis with PCR and DNA sequencing, the human genome project, clinical and genetic characterization of hundreds of head and neck syndromes, as well as the discovery of epigenetic regulation mechanisms.

This Special Issue aims to be at the crossroads of genetics, neurology, ophthalmology, otorhinolaryngology, oral medicine, dentistry, oral maxillofacial surgery, dermatology, pathology, and molecular biology, by inclu

Message from the Editor-in-Chief

Genes is central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fast-moving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised. Why not consider *Genes* for your next genetics paper?

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank: JCR - Q2 (Genetics and Heredity) / CiteScore - Q2 (Genetics (clinical))
