### Prof. Dr. Ian Alsop

Department of Geology and Geophysics, School of Geosciences, University of Aberdeen, Aberdeen AB24 3FX, UK

Deadline for manuscript submissions: closed (15 May 2021)

## Message from the Guest Editors

Dear Colleagues,

It is our pleasure to announce that we have agreed to assemble a Special Issue focussing on the evolution of crustal-scale shear zones (CSSZs). CSSZs often exhibit a complex variety of fault-rocks and related structures that record changes in deformation mechanisms during progressive deformation, and/or deformation during exhumation. CSSZs and the structures associated with them play a crucial role in the development of orogenic belts.

In this Special Issue, we would like to encourage the submission of scientific papers focussing on the study of plastic- and/or brittle-related crustal-scale shear-zones, with particular reference to those characterised by a transition from plastic- to frictional-deformation behaviour. Multiscale structural investigation, supported by the analysis of physical conditions during deformation, represents a fundamental tool to unravel the geodynamic evolution of many ancient and currently active plate boundaries where significant amounts of deformation have accumulated.

# Message from the Editor-in-Chief

Understanding the Earth's origin and its bio-geological evolution, the multiple implications of the geosciences (as a coherentset of interconnected disciplines), and the sociocultural and ethical interdisciplinary approaches, will be crucial for a better understanding of Nature, and also for undertaking scientificallybased political decisions.

We are committed to drive *Geosciences* to a position in which it is recognized for its high-quality, cutting-edge research and scientific influence, and strongly encourage and invite your participation and manuscripts.

# **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions. **High Visibility:** indexed within Scopus, ESCI (Web of Science), GeoRef, Astrophysics Data System, and other databases. **Journal Rank:** CiteScore - Q1 (*General Earth and Planetary Sciences*)
