## Deterioration and Conservation of Materials in Built Heritage

Guest Editors:

**Dr. Chiara Coletti**

Department of Geosciences,  
University of Padova, Padua, Italy

**Prof. Dr. David Martín Freire-Lista**

1. Escola de Ciências da Vida e do Ambiente, Universidade de Trás-os-Montes e Alto Douro, UTAD, Quinta dos Prados, 5000-801 Vila Real, Portugal  
2. Geosciences Center, University of Coimbra, Coimbra, Portugal

Deadline for manuscript  
submissions:

**28 June 2024**

### Message from the Guest Editors

The preservation of built heritage is pursued through conservation strategies. Scientific research of built heritage contribute to the maintainance of identity of cities and communities. Conservation of built heritage deals with a wide range of different materials used in constructions, natural stones and geomaterials (bricks, tiles, mortars, and concretes), and to the type of exposure conditions.

This Special Issue aims to collect research articles and reviews on original and innovative research regarding applications, new methodologies, and case studies addressed to characterize stones and geomaterials, increase knowledge in decay processes and support preservation tools of stone-built heritage
