Message from the Guest Editors

Evidence-based practice (EBP) is a problem-solving approach to clinical decision making that integrates the best available scientific evidence with clinical experience and patient preferences and values.

This Special Issue focused on Evidence-based Practice and Advanced Nursing Care aims to provide nurses and midwives with current knowledge regarding EBP implementation interventions and strategies to avoid EBP barriers and to encourage the use of the EBP. Knowledge regarding nurses' competency on EBP, and training and education interventions in undergraduate and postgraduate or continuing education in nursing and midwifery are also welcome. In addition, we are interested in research that studies the efficacy and effectiveness of nursing interventions in a broad clinical practice context to facilitate evidence-based decision making. Papers following the application of quantitative, qualitative or mixed-methods approaches will be considered.

We encourage submissions from all nurses and midwives researching in EBP and advanced interventions. We hope to be an open communication space that enhance dissemination and exchange of knowledge to a wider audience.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.
Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
