Deadline for manuscript submissions:

closed (30 April 2020)

## **Message from the Guest Editor**

This Special Issue of *IJERPH* aims to advance the field of air pollution within the area of disease burden. This Issue will focus on the novel topic of air pollution in the context of disease's etiology or disease burden. It aims to focus on the effects of air pollution on respiratory, cardiovascular, and brain symptoms/diseases. This Issue welcomes both quantitative and qualitative studies and is intended to include papers that assess the effects of air pollution on the development of diseases, as well as the health impacts. Identification of the sources apportionment and sensitive exposure windows increases the accuracy and precision of risk assessment, and provides the possibility of focusing on preventive efforts in a cost-effective manner.

# Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

#### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase,

GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
