Deadline for manuscript
submissions:

closed (20 April 2020)

Message from the Guest Editors

Dear Colleagues,

This Special Issue of IJERPH welcomes submissions focusing on the relationship between alcohol policy and consumption, or alcohol policy and related harms, and on how to facilitate and achieve the formulation and implementation of evidence-informed policy changes at international/regional, national, and sub-national levels. Submissions may include a focus on activities that may impede or facilitate the formulation and implementation of promising alcohol policies, including working collaboratively with policy makers, improving advocacy strategies, and exposing and countering conflicts of interest and/or the actions of industry actors.

It also welcomes manuscripts that look at how to improve coherence across alcohol, tobacco, and nutrition policies in order to increase the likelihood of policy formulation and impact; how to better evaluate the effectiveness of single or multiple alcohol policies at country level; and how to measure the state of alcohol policy formulation and implementation at country level and changes over time.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
