Message from the Guest Editor

Dear Colleagues,

Despite decades of steady declines in coronary heart disease (CHD) and stroke mortality in many western countries, cardiovascular disease (CVD) is the leading cause of death worldwide. With the aging of populations, higher rates of risk factors (e.g., smoking, physical inactivity), emerging epidemics (e.g., obesity, diabetes, heart failure) and increased economic costs associated with CHD survival, the burden of CVD is projected to steadily increase in coming decades, with less affluent individuals and countries being disproportionately impacted.

This special issue focuses on the contribution of socio-environmental characteristics to disparities in CVD within and across populations. Review papers that critically evaluate the current literature and incorporate suggestions for overcoming shortcomings in future research are encouraged, as are original research papers.

Kathryn Rose, Ph. D.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
