Message from the Guest Editor

Dear Colleagues,

This Special Issue aims to make a significant contribution to research in this field by focusing on encouraging researchers and practitioners to make multidisciplinary, integrated, and holistic efforts to build a sustainable infrastructure for the dissemination of cancer prevention and control measures of cancer care. High-quality research in BC is one of the most essential infrastructure factors.

The ways in which researchers and professionals tackle these challenges now will determine the wellbeing of FBC patients in terms of their hope for successful recovery and better HRQOL. Thus, this Special Issue seeks to publish original, experimental, theoretical, and applied research about FBC health, presentation, and control. The issue presents interdisciplinary approaches combining medical, psychological, psychosocial, mental, social, and psychiatric perspectives in an attempt to improve the diagnosis, treatment, and prevention of FBC.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
