### Message from the Guest Editors

Dear Colleagues,

Despite the significant growth that telehealth has experienced in recent decades at a global level, much remains to be done to standardize it. Due to the confinement caused by the COVID-19 pandemic, there has been a very rapid implementation of telehealth, especially in more developed societies, which otherwise would have taken a longer time to get established and develop. Therefore, telehealth has become a key piece for public health.

The main objective of this Special Issue is to give visibility and added value to research in the field of telehealth.

This Special Issue offers an opportunity to publish high-quality interdisciplinary research papers and reviews that inform on the wide range of topics related to public health and telehealth.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
