### Message from the Guest Editor

Dear Colleagues,

Financial economics is a vibrant field of research emerging from a synergy between mathematical economics and mathematical finance. The main goal of this Special Issue of the International Journal of Financial Studies is to encourage theoretical and applied research in the intersection of finance and economics, which is of interest to both academics and practitioners.

For this purpose, this Special Issue on “Financial Economics” invites papers on topics, such as, but not limited to: General equilibrium, monetary and fiscal policy, public finance, incomplete financial assets, corporate finance, asset pricing, exchange rate modeling, production under uncertainty, dynamic programming, and financial markets.

## Message from the Editor-in-Chief

I'm thrilled to take the leadership reins of the *International Journal of Financial Studies* and welcome the opportunity to make it one of the vanguard open-source scientific journals in our field. I eagerly look forward to working with the journal editorial team in building upon the quality instilled by my predecessor to develop the title further and broaden the appeal to other new finance research areas while keeping our core a high-quality finance journal that serves and highly values the scientific community, readers and authors alike. *IJFS* aims to publish high-quality manuscripts in both theoretical and empirical finance spanning all the major research areas in the field. It aims to provide an outlet for original finance scholarly research that promotes interaction among finance scholars and practitioners and bridges the divide that can exist between them.
