# **Upscaling AI Solutions for Large Scale Mapping Applications**

Dear Colleagues,

Guest Editors:

# Message from the Guest Editors

Cadastral Agencies (NMCA) problems.

Prof. Dr. Fabio Remondino

3D Optical Metrology (3DOM) Unit, Bruno Kessler Foundation (FBK), 38123 Trento, Italy

### Prof. Dr. Joep Crompvoets

Public Governance Institutre, KU Leuven, Parkstraat 45, Bus 3609, B-3000 Leuven, Belgium

### Prof. Norbert Haala

Institute for Photogrammetry, University of Stuttgart, Geschwister-Scholl-Strasse 24, 70174 Stuttgart, Germany

Deadline for manuscript submissions: closed (31 December 2022)

Artificial Intelligence (AI) is entering all domains, with innovative solutions and results that would have been both unpredictable and unachievable just a few years ago. Geospatial AI is also growing. Recently, interesting research results have been presented for point cloud classification, object detection, feature extraction, semantic segmentation, etc. Nonetheless, the challenge remains on how to apply these methods and results to nationwide 3D data sets and how to have solutions that are reliable,

This issue is organized in collaboration with EuroSDR (http://eurosdr.net/), a not-for-profit organization linking NMCAs with research institutes and universities in Europe for the purpose of applied research in spatial data provision, management, and delivery.

replicable, and applicable to National Mapping and

It aims to raise awareness and understanding of AI methods applied to large geodata as well as to collect ongoing research activities to boost the use of AI within the context of NMCA. It also aims to understand the impact, benefits, effect, and open issues of AI applied to large geospatial datasets.

# **Editor-in-Chief**

#### Prof. Dr. Wolfgang Kainz

Cartography and Geographic Information Science, Department of Geography and Regional Research, University of Vienna, Universitätsstr. 7, A-1010 Vienna, Austria The *ISPRS International Journal of Geo-Information* invites you to submit research articles, reviews, and reports covering topics of the whole domain of geo-information. Although the journal was only founded in 2012, it has already achieved wide recognition in the scientific community. We are proud that since April 2015, our journal is indexed by the SCIE of the Web of Science. As Editor-in-Chief, I encourage you to consider *IJGI* for your scientific papers and would be pleased to welcome you as authors.

Message from the Editor-in-Chief

### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), GeoRef, PubAg, dblp, Astrophysics Data System, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Geography, Physical*) / CiteScore - Q1 (*Geography, Planning and Development*)
