## Spatio-Temporal Data Quality for Civil Science Information

Guest Editors:

**Prof. Dr. A. Stein**

Faculty of Geo-information  
Science and Earth Observation  
(ITC), University of Twente, PO  
Box 217, 7500 AE Enschede, The  
Netherlands

**Prof. Dr. John Shi**

Department of Land Surveying  
and Geo-Informatics, Otto Poon  
Charitable Foundation Professor  
in Urban Informatics, The Hong  
Kong Polytechnic University,  
Hong Kong

**Prof. Dr. Mahmoud Reza  
Delavar**

Center of Excellence in Geomatic  
Engineering in Disaster  
Management, School of  
Surveying and Geospatial Eng.,  
College of Eng., University of  
Tehran, Tehran, Iran

Deadline for manuscript  
submissions:

**closed (31 January 2021)**

### Message from the Guest Editors

Spatial and spatio/temporal data quality is at the core of any quantitative analysis in space and time. The standard ways of addressing the consequences of low-quality data may need to be extended for new data sources. Moreover, more and different aspects of data quality become important, such as confidentiality, accessibility, and trustworthiness of the data and the role of metadata. This in particular applies to the totally new domain of civil science information.

In this Special Issue, attention will be given to the quality of citizen science data, being big spatial and spatiotemporal data in terms of their volume and variability. The Special Issue will show the trends and the latest developments in these fields. We favor a quantitative approach, where general procedures and methodologies for analysis are presented. All methods are illustrated with relevant applications and examples. Purely theoretical manuscripts will only be considered if they are novel, generic, and presented in an accessible fashion. We invite original research contributions covering a broad variety of aspects different research fields, across disciplines and organizations.

## Editor-in-Chief

### **Prof. Dr. Wolfgang Kainz**

Cartography and Geographic  
Information Science, Department  
of Geography and Regional  
Research, University of Vienna,  
Universitätsstr. 7, A-1010 Vienna,  
Austria

## Message from the Editor-in-Chief

The *ISPRS International Journal of Geo-Information* invites you to submit research articles, reviews, and reports covering topics of the whole domain of geo-information. Although the journal was only founded in 2012, it has already achieved wide recognition in the scientific community. We are proud that since April 2015, our journal is indexed by the SCIE of the Web of Science. As Editor-in-Chief, I encourage you to consider *IJGI* for your scientific papers and would be pleased to welcome you as authors.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [GeoRef](#), [PubAg](#), [dblp](#), [Astrophysics Data System](#), [Inspec](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Geography, Physical*) / CiteScore - Q1 (*Geography, Planning and Development*)
