Deadline for manuscript
submissions:

30 June 2024

Message from the Guest Editor

Fibrosis is a condition that develops in inflammations and cancer. It can be the result of disbalances in the homeostasis of the cells that form the stroma in a certain tissue. The growing fibrotic tissue can impair the functions of the part of the gastrointestinal system that is being affected. In general, the result will depend on the extent of the damage but, usually, might contribute to the development of inflammation or the growth of cancerous cells.

Nowadays it is accepted that the conditions developed within the stroma contribute significantly to the pathogenic process. Moreover, modulation of the interrelationships and/or communication established between different cell types of the stroma is emerging as potential regulator of pathophysiology. Therefore, understanding of cellular and molecular basis of cell-to-cell interconnections is of critical relevance and can be used to find keys to fight disease development and to find a potential cure.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
