Message from the Guest Editor

Dear Colleagues,

The impact of sulfation on biological processes has been of interest for decades, particularly with regard to the inherited deficiency of sulfatases in the mucopolysaccharidoses; these include MPS VI (Maroteaux-Lamy Syndrome), in which there is a deficiency of N-acetylgalactosamine-4-sulfatase, and MPS IVA, in which there is a deficiency of N-acetylgalactosamine-6-sulfatase (Morquio Syndrome). Recently, attention has been directed to the molecular consequences of an acquired decline in sulfatase activity due to changes in the cellular microenvironment. In this collection of articles, the range of effects of sulfation and of sulfatase and sulfotransferase activity on pathobiology will be examined. This increased focus on the role of sulfation in signalling and the regulation of vital cell functions, including proliferation, differentiation, and transcription, may provide novel insights into basic metabolic and molecular pathways and offer new targets able to improve human health.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
