# Novel Therapeutic Strategies for Gynecological Cancer: Molecular Biological Insights

Guest Editor:

#### Dr. Jiantai Timothy Qiu

College of Medicine, Taipei Medical University, Taipei 110, Taiwan

Deadline for manuscript submissions: closed (20 April 2025)

## Message from the Guest Editor

Dear Colleagues,

Gynecological cancers, including those of the ovaries, cervix, uterus, fallopian tubes, and vulva, pose significant challenges in clinical management and treatment. Despite advances in traditional therapies such as surgery, chemotherapy, and radiation, the recurrence rates and associated with these mortality cancers remain substantial. In recent years, there has been a growing interest in exploring novel therapeutic strategies that target molecular pathways involved in the development and progression of gynecological malignancies. These approaches offer promising avenues for more effective and personalized treatment options. Here, we delve into some of the key molecular biological insights driving these novel therapeutic strategies.

The present Special Issue, entitled "Novel Therapeutic Strategies for Gynecological Cancer: Molecular Biological Insights", aims to present recent research developments to the wider community involved in this field. We welcome contributions in this field.

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
