Japan

Deadline for manuscript  
submissions:

**30 July 2024**

### **Message from the Guest Editor**

Dear Colleagues,

Leukemia is an aggressive hematologic malignancy often characterized by specific genomic alterations. The standard treatment strategy for acute leukemia largely comprises intensive chemotherapy with or without hematopoietic stem cell transplantation. However, long-term survival can be achieved in only up to approximately three-quarters of patients, even in the favorable risk group. Molecular-targeted therapy has had a significant impact on clinical practice, especially for patients with specific genomic abnormalities such as FLT3- and IDH1/2-mutations. In this Special Issue, our focus is on the cutting edge of genomic oncology and precision medicine in leukemia, and the progress from molecular pathogenesis to novel therapeutic approaches.

Dr. Yosuke Minami

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
