Deadline for manuscript submissions:

30 September 2024

Message from the Guest Editor

Dear Colleagues,

Cell-cell adhesion is critical in reproduction and cancer. This ensures proper recognition and binding between cells, whether these are spermatozoa and oocytes, or cancer cells and host tissues. Adhesion molecules play critical roles in both processes. Cell adhesion is tightly regulated by signaling events also crucial for reproductive processes, such as embryonic development, tissue remodeling, and immune regulation, are also dysregulated in cancer. Several pathways play essential roles in both normal reproductive physiology and cancer progression, and their dysregulation can lead to aberrant cell proliferation, differentiation, and migration, contributing to tumorigenesis or reproductive success and related disorders.

The special issue provides insights into both normal physiological processes and disease pathogenesis, with implications for therapeutic interventions in cancer and reproductive disorders.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
