Nursing, Medical University of
Białystok, Szpitalna 37, 15-274
Białystok, Poland

Deadline for manuscript
submissions:

30 September 2024

Message from the Guest Editors

Dear Colleagues,

Gastrointestinal tract cancers pose a significant public health challenge globally, and their incidence is constantly increasing. We suffer from colon cancer more often, but the number of liver cancer cases is also increasing. At the same time, three cancers of the gastrointestinal tract, pancreatic cancer, gallbladder cancer, and liver and intrahepatic bile duct cancer, were placed on the list of the ten most lethal cancers by the American Society of Oncology (ACS).

The molecular aspects of gastrointestinal cancers are the subject of intense research, which may lead to generating a better understanding of the genetic changes and molecular pathways associated with gastrointestinal cancers, facilitating the development of targeted therapies and personalized therapeutic approaches, contributing to improving patient outcomes, greater diagnostic accuracy, and a better overall survival rate.

In this Special Issue, we present original research and literature reviews discussing various aspects of the pathology, diagnosis, and therapy of gastrointestinal cancer.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
