Deadline for manuscript
submissions:

30 June 2024

Message from the Guest Editor

Dear Colleagues,

Synucleins are vertebrate-conserved proteins particularly expressed in the central nervous system. Alpha, beta and gamma synucleins are peculiar proteins involved in important neurodegenerative diseases such as Parkinson's disease and in tumours. Synucleins are biologically fascinating proteins, in particular, alpha synuclein, due to their prion-like characteristics. An in-depth study of the neurobiology of these proteins is essential to understand their role and the pathogenic mechanisms in which they are involved. The purpose of this Special Issue is to collect scientific articles and reviews that can contribute to the advancement of knowledge in this field.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
