Message from the Guest Editor

Dear Colleagues,

Common complications of pregnancy include preterm labor, placental abruption, pre-eclampsia and gestational diabetes. Managing these conditions during pregnancy is crucial. Beyond that, it is important to acknowledge that these conditions may recur in subsequent pregnancies. Furthermore, pregnancy complications can have implications for the long-term health of the mother.

Early diagnosis and prevention are paramount. Molecular-level research contributes to a deeper understanding of the molecular mechanisms of diseases, enabling the development of more precise diagnostic methods and prevention and treatment strategies targeted at specific molecular markers. We welcome all innovative studies offering valuable insights for the benefit of the scientific community.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
