Message from the Guest Editors

Dear Colleagues,

Developing an informed understanding of brain tumors through a comprehensive exploration of molecular research represents a contemporary challenge in clinical practice. Molecular research forms a pivotal aspect of this Special Issue, elucidating the genetic and molecular intricacies underlying brain tumors. By spotlighting recent breakthroughs in molecular diagnostics, this collection aims to foster a deeper comprehension of the biological mechanisms that drive different brain tumors' initiation, progression, and response to therapy.

This collection serves not only as a resource but as a valuable guide for medical professionals, researchers, and practitioners, keeping you abreast of the latest developments in the ever-evolving field of brain tumor research. Join us on this transformative journey as we advance knowledge and shape the landscape of brain tumor diagnostics and treatment.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
