

Applied and Translational Research on Bioactive Peptides and Proteins

Guest Editor:

Dr. Paola Gagni

Istituto di Scienze e Tecnologie
Chimiche (SCITEC) "Giulio Natta",
Consiglio Nazionale delle
Ricerche (CNR), 20133 Milan, Italy

Deadline for manuscript
submissions:

31 May 2024

Message from the Guest Editor

Every synthesized protein and its specific post-translational modification can putatively act as a bioactive molecule, enabling the use of a wide range of biological materials as a peptide source, from bacterial-, animal- or plant-derived cell cultures to biofluids, and from food to microbial environments. Furthermore, these proteins and peptides could be exploited as potential disease biomarkers, as they have been largely investigated in relation to their 3D structure, cellular compartmentalization, interactions and functions, paving the way to the discovery of new physiological and pathological pathways in living organisms. In addition to this, improvements in molecular engineering, biotechnology and chemical synthesis have contributed to the development of both a new generation of biosensors and innovative biotechnological drugs, such as, for example, antimicrobial agents, antihypertensive compounds, antioxidants or blood-lipid-lowering active molecules. Last, but not least, bioactive proteins play an increasingly central role in the food industry due to their nutraceutical effect.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Maurizio Battino

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
