Messina, Italy

Deadline for manuscript  
submissions:

**25 July 2024**

### Message from the Guest Editor

Inflammation is a process by which the body's white blood cells and the substances they produce protect against infection from outside invaders, such as bacteria and viruses. However, in some diseases, the body's defense system—the immune system—triggers inflammation when there are no invaders to fight off. In these autoimmune diseases, the immune system acts as if regular tissues are infected or somehow unusual, causing damage. Inflammation can be either short-lived (acute) or long-lasting (chronic).

A growing number of molecules have been suggested to contribute to the development of acute and chronic inflammation. However, the mechanisms are not fully understood. More recently, molecular mechanisms that initiate the resolution of inflammation have opened a new avenue for pro-resolution strategies to treat complex acute and chronic inflammatory diseases. However, resolution pathways are heterogeneous and most likely tissue- and stimulus-specific.

For this Special Issue, we invite original research and reviews in the field of acute and chronic inflammation, with a focus on the molecular mechanisms of inflammation persistence versus resolution.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
