Message from the Guest Editors

Autism spectrum disorders are a group of conditions among neurodevelopmental disorders characterized by sociocommunicative impairment together with repetitive behaviors.

We welcome authors to submit original research and review articles contributing to a better understand the following, or related, topics: i) the application of advanced neuroimaging (either structural or functional) techniques in autism spectrum disorders, focused either on neural underpinnings or brain plasticity related to treatment outcome/monitoring; ii) genetic studies in the field of autism; and iii) epigenetics studies in the field of autism.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
