Deadline for manuscript  
submissions:

**closed (28 February 2019)**

### Message from the Guest Editors

Dear Colleagues,

Mosquito-transmitted RNA viruses (arboviruses), such as dengue, Japanese encephalitis, West Nile, yellow fever, Zika, chikungunya, Ross River, and Rift Valley fever, are becoming major public health concerns due to their global dispersion. In the context of increasing numbers of outbreaks and severity of infection, it is urgent to understand the mechanisms underlying enhanced virulence of arboviruses in humans. Consequently, molecular research is important for improving our knowledge on viral and cellular factors that impact the pathogenicity of arboviruses in their mosquito vectors and mammalian hosts, including humans. In addition, the analysis of interdependent consequences of viral factors and host responses has the potential to reveal important pathways involved in the pathogenicity of arboviruses in humans. In this Special Issue, the contributors are warmly invited to publish their research works on molecular biology of arboviruses, molecular basis of their pathogenicity in link with the host–cell response to infection, and innate immune evasion strategies in arthropod vectors and mammalian hosts.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
