Dear Colleagues,

The research history on chitins, one of the most major and abundant natural polysaccharides on earth, has been started around 40 years ago. Since the 1980s, chitin and chitosan research (including D-glucosamine, *N*-acetyl-D-glucosamine, and their oligomers) has progressed significantly over several stages in both fundamental and industrial fields. With the opening of this Special Issue, "Chitins", we are planning to produce a strong, very exciting issue that will encompass breakthroughs in highly valuable, scientific, and industrial research in this field. The Special Issue covers recent trends in all aspects of basic and applied scientific research on chitin, chitosan and their derivatives.

We look forward very much to your input.

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
