Message from the Guest Editor

Dear Colleagues,

The modern management of respiratory infections is related to *precision* and *preventive* medicine approaches. The knowledge of the pathophysiology and molecular biology pathways are the basis for a *precise* approach, on the other hand, the knowledge of epidemiology, risk factors and patient's characteristics are the basis for a *preventive* approach. New treatment models, based on both *precision* and *preventive* medicine, are on the blocks in COPD exacerbation, pneumonia, bronchiectasis and cystic fibrosis. The understanding of underlying biology, patient's risk factors and microbe epidemiology are fundamental to guide physicians therapeutic and management decisions. This Special Issue will address the new evidence on molecular and pathophysiological mechanisms, and new opportunities in the management of respiratory infections.

Prof. Dr. Francesco Blasi

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
