Medicine, Sendai, Miyagi, Japan

Prof. Dr. Makoto Makishima

Division of Biochemistry,
Department of Biomedical
Sciences, Nihon University
School of Medicine, Itabashi-ku,
Tokyo, Japan

Deadline for manuscript
submissions:

closed (31 May 2018)

Message from the Guest Editors

Nuclear receptors include steroid/thyroid hormone receptors, metabolic sensors and orphan receptors. Metabolic sensor-type nuclear receptors, such as liver X receptor, farnesoid X receptor and peroxisome proliferator activator receptor (PPAR), are activated by oxysterol, bile acid and fatty acid, and regulate their metabolism. These receptors, like steroid hormone receptors, also regulate cellular proliferation/differentiation, and immunity. Dysregulation in these systems has been implicated in the pathogenesis of human diseases, such as cancer, cardiovascular disease, and inflammation. Moreover, nuclear receptors including PPAR, retinoid receptors, and several orphan receptors have recently been known to be involved in the etiology of metabolic syndrome and atherosclerosis. In this Special Issue, we are pleased to invite original manuscripts focusing on the relationships between nuclear receptors and human disorders, as well as novel drug innovation.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Maurizio Battino

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
