

Nanoparticle Protein Corona and Its Biological Applications

Guest Editors:

Dr. Neus Feliu

Fachbereich Physik und Chemie
and Center for Hybrid
Nanostructures, Universität
Hamburg, Hamburg, Germany

Dr. Monica Carril

Biophysics Institute (CSIC-
UPV/EHU), Leioa, Spain

Deadline for manuscript
submissions:

closed (25 September 2019)

Message from the Guest Editors

The formation of the biomolecular corona influences the behavior of nanoparticles in vitro and in vivo and ultimately its final fate and successful application. Detailed investigation of the biological identity of nanoparticles under different physiological conditions and environments is needed to improve understanding of the protein-nanoparticle interactions. Therefore, it is essential to provide with precise analysis of the corona, to be able to predict the biological interactions and to improve nanomedicines toward its clinical translation.

In this Special Issue, we aim to provide an overview of the current advances and pitfalls on the bio-nano interactions field. We would like to invite you to submit research papers or review articles discussing the most recent advances in this research area. We expect contributions from a broad community of scientists working on a wide range of disciplines, covering from nanomaterial synthesis to biomedical applications, toxicity implications as well as novel approaches and biotechniques for accurate bio-corona analysis on nanoparticles.

We look forward to receiving your valuable research contributions.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
