Message from the Guest Editors

Dear Colleagues,

The ability to effectively collect, integrate, manage, and share data, in order to turn them into useful information, is widely recognized as one of the most important strategies for making modern organizations competitive in today's information society. Ontology-Based Data Management (OBDM) is a recently-proposed paradigm that tackles the abovementioned problem by relying on the use of semantic technologies. In particular, OBDM systems resort to a three-level architecture, constituted by the ontology, the sources, and the mapping between the two, where the ontology is a conceptual representation of the domain of interest in the underlying information system.

This Special Issue aims to assemble novel results on the OBDM paradigm and its application to real-world scenarios. We solicit original submissions of both papers presenting foundational works on OBDM and papers that report and evaluate experimentations where the OBDM paradigm is followed.

Message from the Editor-in-Chief

Informatics (ISSN 2227-9709) is an international, peer-reviewed, open access journal, which publishes original theoretical and empirical work on the science of informatics and its application in multiple fields. Our concept of Informatics includes technologies of information and communication as well as the biological, social, linguistic and cultural changes that initiate, accompany and complicate their development.

Informatics publishes regular research articles, reviews and short notes. There is no restriction on the length of papers, and we encourage researchers to publish their theoretical and empirical results in as much detail as possible. The scientific community and the public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [ESCI \(Web of Science\)](#), [dblp](#), and [other databases](#).

Journal Rank: CiteScore - Q1 (Communication)
