Message from the Guest Editors

The aim of this Special Issue is to provide insight regarding the most innovative contributions to the application of big data analytics and mobile cloud computing in the area of the Internet of Things. The development of the Internet of Things (IoT) is advancing rapidly and that has led to the connection of millions of devices via the internet. Big data comprises high-volume, high-velocity, and/or high-variety information assets that require new forms of processing to enable enhanced decision making, insight discovery and process optimization. Mobile cloud computing (MCC) is an emergent paradigm that attends to the deployment of mobile applications and services in a collaborative manner across multiple clouds.

Avenue, Wollongong, NSW 2522,
Australia

Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

Information is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [ESCI \(Web of Science\)](#), [Ei Compendex](#), [dblp](#), and [other databases](#).

Journal Rank: JCR - Q2 (Computer Science, Information Systems) / CiteScore - Q2 (Information Systems)
