Message from the Guest Editors

Dear Colleagues,

We invite contributions that cover all aspect of the use of Open Data and geospatial analysis in fostering inclusive, resilient, open and sustainable communities.

The explosive growth of cities and the rapid expansion of broadband and data are intersecting at a time when the world faces serious challenges to achieving more sustainable development. Sensors and digital devices generate huge amount of data from which cities and governments can create indicators and learn new knowledge. Cities now have an important role to play in national and local open data initiatives. Data user communities are trying to tackle various urban challenges for many intermediaries that see open data as the key factor to improve their services.

This Special Issue will contain extended versions of selected papers presented at AGILE 2018 pre-conference workshop titled Open Data for Open Cities (http://opendata4opencities.uji.es) held in Lund, Sweden, 12 June 2018. AGILE 2018 is the annual international conference on Geographic Information Science.

Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

Information is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, and other databases.
Journal Rank: CiteScore - Q2 (*Information Systems*)
