IoT and Energy Internet

Guest Editors:

Prof. Dr. Josep M. Guerrero

Department of Electronic
Engineering, Technical University
of Catalonia, Barcelona, Spain

Prof. Dr. Juan C. Vasquez

Department of Energy
Technology, Aalborg University,
Pontoppidanstræde 111, 9220
Aalborg Ø, Denmark

Dr. Yajuan Guan

Department of Energy
Technology, Aalborg University,
Pontoppidanstræde 111, 9220
Aalborg Ø, Denmark

Deadline for manuscript
submissions:

closed (31 July 2019)

Message from the Guest Editors

The Internet of Things (IoT) is a paradigm that converges a variety of physical, digital and virtual things through information networks, to smart environments, which cover energy, buildings, transport, cities, healthcare, etc. As an important application of IoT-enabled solutions, Energy Internet has become one of the most promising power distribution infrastructures to promote a revolutionary vision of the smart grid. The integration of energy systems, e.g. energy generation and delivery, management and consumption, with IoT architectures includes a great deal of heterogeneous devices, sensors, appliances, communication networks, information technologies, etc. introducing advanced improvements and opportunities, such as interoperability, responsiveness, robustness, advanced demanded side response, and energy efficiency enhancement. The aforementioned advantages and challenges demand extensive exploration and investigation in a cross-disciplinary field.

This Special Issue aims to foster innovative research and state-of-the-art advances in new algorithms, control strategies, communication technologies and applications in IoT-empowered smart energy systems.

an Open Access Journal by MDPI

Editors-in-Chief

Prof. Dr. Chien-Hung Liu

Department of Mechanical
Engineering, National Chung
Hsing University, 250 Kuo Kuang
Rd., Taichung 402, Taiwan

Prof. Dr. Shoou-Jinn Chang

Department of Electrical
Engineering, National Cheng
Kung University, Tainan 701,
Taiwan

Message from the Editorial Board

The unique journal *Inventions* is different from all other journals. Many scholars spend their lives publishing research papers in many different journals, but most of these journals do not help scholars collate and analyze their results or assist in promoting them to a relevant industry. However, *Inventions* will help authors not only to publish their papers in the journal, but also to promote their research results to industry and assist them in realizing the purpose of technology transfer. In the future, *Inventions* will help authors to evaluate their technology license fees based on the valuation theory and approaches and also help authors to show their patents and technologies on a network transaction platform.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), Inspec, and other databases.

Journal Rank: CiteScore - Q1 (*General Engineering*)
