Heat Transfer and Its Innovative Applications

Guest Editors:

Prof. Dr. Ping-Hei Chen

Department of Mechanical
Engineering, National Taiwan
University, Taipei 106, Taiwan

Prof. Dr. Hyung Hee Cho

Department of Mechanical
Engineering, Yonsei University,
120-749 Seoul, Korea

Deadline for manuscript
submissions:

closed (31 July 2018)

Message from the Guest Editors

Many innovative and high-end techniques have been developed and employed for changing our daily lives, namely, artificial intelligence (AI) technology, autonomous car, hyper-loop for high-speed transportation, miniaturization of electronic devices, and heat dissipation from cooling films to outer space, and so on. However, these innovative technologies can not reach their optimal performance without adequate techniques for heat transfer or a well-control of temperature during operation.

Manuscripts are welcome to be submitted to cover the topics of thermal management of data centers, electronic devices, renewable energy applications, autonomous cars, thin films with well-defined structures for reflection or emission of thermal radiation, two-phase heat transfer phenomenon on surfaces with hierarchical structures, and applications of AI with regards to heat transfer. Furthermore, we invite manuscripts that focus on novel research regarding the development of components, equipment, and techniques involving thermal processes. However, special topics are not limited to the aforementioned ones.

Special Issue

an Open Access Journal by MDPI

Editors-in-Chief

Prof. Dr. Chien-Hung Liu

Department of Mechanical
Engineering, National Chung
Hsing University, 250 Kuo Kuang
Rd., Taichung 402, Taiwan

Prof. Dr. Shoou-Jinn Chang

Department of Electrical
Engineering, National Cheng
Kung University, Tainan 701,
Taiwan

Message from the Editorial Board

The unique journal *Inventions* is different from all other journals. Many scholars spend their lives publishing research papers in many different journals, but most of these journals do not help scholars collate and analyze their results or assist in promoting them to a relevant industry. However, *Inventions* will help authors not only to publish their papers in the journal, but also to promote their research results to industry and assist them in realizing the purpose of technology transfer. In the future, *Inventions* will help authors to evaluate their technology license fees based on the valuation theory and approaches and also help authors to show their patents and technologies on a network transaction platform.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), Inspec, Ei Compendex and other databases.

Journal Rank: JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
