Message from the Guest Editors

The art and science of clinical outcomes analysis, quality improvement, perioperative management of surgical patients, and patient safety continue to evolve at an increasingly rapid pace. Over the years, novel concepts have arisen (risk stratification, shared decision making, interdisciplinary meetings, prehabilitation, etc.), new initiatives have taken shape (e.g., state/nation-wide or international clinical databases), and new technologies and methods have been adopted across all surgical specialties (e.g., minimally invasive or robotic approaches).

In order to raise the standards of healthcare services, understanding and evolving these topics represents an essential duty of all surgeons, physicians, and professionals related to surgical patients. In this context, we call all surgeons, physicians, and professionals from all the associated disciplines involved in the perioperative pathway of surgical patients (surgeons, anesthesiologists, radiologists, intensivists, cardiologists, oncologists, pulmonologists, nurses, physiotherapists, etc.) to contribute to this Special Issue.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
