Deadline for manuscript
submissions:

15 November 2024

Message from the Guest Editors

Dear Colleagues,

Regional anaesthesia (RA) and acute pain medicine have undergone exciting advances in the past few decades and have emerged as a transformative force to redefine the paradigms of patients' care. The seamless integration of RA with acute pain management protocols has far-reaching implications for patient outcomes. From minimizing opioid usage and associated side-effects to expediting recovery timelines, this holistic approach stands as a testament to the ever-evolving nature of medical science. It becomes increasingly apparent that RA and acute pain management are not merely adjuncts, but rather integral components in the continuum of patient-centered care. However, the fields have not yet reached their full potential. Emerging nerve blocks and updated acute pain management practices, though recent, have room for refinement. The goal of this Special Issue is to focus on contemporary evidence, underscore prevailing topics and highlight future directions in the aforementioned fields. The journal and the Guest Editors cordially invite you to submit your high-impact findings for review. We look forward to your contributions to this important Special Issue.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
