Message from the Guest Editors

Dear Colleagues,

.

Catheter-directed treatments (CDTs) consist of a series of catheter-based techniques used to obtain pulmonary vessel reperfusion in acute pulmonary embolism (PE).

According to international guidelines, CDTs should be the considered as a first-line treatment in high-risk PE patients in whom systemic thrombolysis (ST) is contraindicated or has failed, and as bailout in case of hemodynamic decompensation in anticoagulant therapy in intermediate–high-risk patients.

In this scenario, there is a growing clinical and scientific interest in CDTs because they could tackle some unresolved issues targeting the treatment of pulmonary arteries and avoiding the dreaded complication of ST.

Several areas in this field need to be further assessed, including the definition of treatment failure or the long-term effect of CDTs.

The aim of this Special Issue is to gather evidence regarding the currently available CDT approaches in PE patients, patient selection, and the timing and techniques of the procedure.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
