### Message from the Guest Editors

Dear Colleagues,

Thyroid diseases arise due to imbalances in thyroid hormone production, leading to either overactive (hyperthyroidism) or underactive (hypothyroidism) thyroid function. Hyperthyroidism results from excessive production of thyroid hormones, leading to symptoms such as weight loss, rapid heartbeat, and anxiety. On the other hand, hypothyroidism occurs when the thyroid gland fails to produce enough hormones, causing fatigue, weight gain, and depression. Other thyroid disorders include thyroid nodules, goiter, and thyroid cancer.

Diagnosis of thyroid diseases involves a combination of medical history, physical examination, blood tests, and imaging techniques such as ultrasound or thyroid scans. Regular monitoring, adherence to prescribed medication, and lifestyle modifications are essential for long-term management.

This issue aims to collect clinical, experimental, and review studies that improve knowledge in the field of thyroid diseases. We look forward to receiving your contributions to this Special Issue.

## Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
