submissions:

8 July 2024

Message from the Guest Editors

We are delighted to introduce this Special Issue, “Clinical Therapeutic Advances in Urological Cancer”, aimed at disseminating the latest research in the field of urological cancer treatment. Urological cancers, including prostate, urothelial, kidney, penile, and testicular cancer, represent a significant global health challenge. The primary objectives of this Special Issue are to assess the current status of research in this field, address core problems in urological cancer therapy, and provide a platform for innovative solutions.

This Special Issue’s scope encompasses a wide range of topics, such as novel treatment modalities, biomarker development, personalized medicine, immunotherapy, and advances in surgical techniques. We invite contributions focused on improving early detection, improving treatment efficacy, minimizing side effects, and ultimately enhancing the quality of life of urological cancer patients.

We encourage researchers, clinicians, and experts in the field to mobilize their knowledge and experience to advance the clinical therapeutic landscape of urological cancers.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPUS / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
