Message from the Guest Editors

Dear Colleagues,

Recent progresses in scientific knowledge have made new diagnostic biomarkers available. This could pave the way for ground-breaking therapeutic and diagnostic tools, which might improve and ease the management of respiratory diseases.

In this Special Issue, we pursue original research studies and reviews that advance the knowledge of clinicians on diagnostic biomarkers for any respiratory disease.

Furthermore, we are particularly interested in studies about novel non-invasive diagnostic biomarkers, e.g., in exhaled breath and/or in sputum. In addition, aspirant authors are encouraged to submit the results of human studies and clinical trials.

Dr. Silvano Dragonieri

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
