Message from the Guest Editor

Dear Colleagues,

We are delighted to present a new Special Issue “Epileptic Seizures in Critically Ill Patients”, Guest Edited by Dr. Stephane Legriel, from the Versailles hospital, France.

Epileptic seizures in critically ill patients involves various multi-disciplinary teams, including but not limited to medical physicians and nurses from emergency departments, operating rooms, or intensive and neurocritical care units. Management associates general measures with organ failure supportive care according to patients severity, antiepileptic treatment appropriate for the electrical and clinical pattern in the patient, investigations for a cause and etiological treatment, and electroencephalography monitoring. To date, few outcome data are available regarding the large spectrum of presentation, underlying conditions, immediate severity and outcomes in critically ill patients with epileptic seizures in these settings.

The Special Issue aims to invite authors to contribute original research articles, as well as review articles related to all aspects of epileptic seizures in critically ill patients, diagnosis, management, and outcomes.

Dr. Stephane Legriel

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPUS / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
